Objective

Enthusiastic and detail-oriented B.Tech CSE student specializing in Cloud Computing & Automation, aiming for a Frontend Developer role. Proficient in HTML, CSS, JavaScript, Java (OOP), and basic DSA. Passionate about creating responsive, user-focused web solutions and continuously learning modern development tools.

Projects

[Notes App](#)

- Built a browser-based note-taking application with localStorage-based data persistence.
- Enabled functionality to add/delete notes with smooth UI design and responsive layout.

[Weather App](#)

- Developed a weather forecasting app using OpenWeather API with city-based search.
- Implemented real-time data fetch, temperature & condition display, and responsive UI.

Other Projects: [Recipe Website](#), MoodBoard Journal Website
